FWBS PREPARE FOR THE RTA CLAIMS PROCESS

Dated – 12 March 2010

The MOJ reform of the new RTA claims handling procedure is now due to take effect from the 30th April 2010. The new system supports the RTA PI Claims reforms process for low value personal injury claims (£1,000 - £10,000) and provides a way to transfer information electronically.

FWBS have been involved with the A2A project being one of the first groups to be allowed access to the test harness. We have an active working group of customers who are currently assisting with testing the interface in their existing Case Management system.

FWBS are providing modules for both claimant and defendant based representatives.

For more information please contact us.

#

Established in 1997, FWBS has led the way in providing leading-edge technologies to meet the demands faced by law firms & corporate legal departments worldwide.

The Matter Centre product forms the core of an expanding suite of solutions from FWBS, which enable legal professionals to have tangible improvement to productivity and therefore profitability, with ease of deployment. It provides versatile, client & matter centric information management, Case/work flow, Contact management, resource control and reporting for the whole firm, all from within the Microsoft Office suite.
